Depot Purchase Management

COSMOSOFT BUSINESS SOLUTIONS (PVT.) LTD. About us

Cosmosoft Business Solutions (Pvt.) Ltd. is a leading Sugar Industry Automation & ERP Design & Development Firm operating since 1997 in Pakistan. Our Sugar Industry clientage are including,

- **Madina Sugar Mills Ltd.**
- **Ashraf Sugar Mills Ltd.**
- **SGM Sugar Mills Ltd.**
- **Sindh Abadgar's Sugar Mills Ltd.**
- **Popular Sugar Mills Ltd.**
- **Chashma Sugar Mills Ltd, (Unit I & II)**
- **Premier sugar Mills & distillery Company Ltd.**
- **Huda Sugar Mills Ltd.**
- **Jauharabad Sugar Mills Ltd.**
- **Mehran Sugar Mills Ltd.**
- **Pasrur Sugar Mills Ltd.**
- **Chaudhry Sugar Mills Ltd.**
- **Brother Sugar Mills Ltd.**
- **United Ethanol Industries Ltd.**
- **Alman Seyyam Sugar Mills (Pvt.)Ltd.**
- **Premier Ethanol Industries Ltd.**
- **Noon Sugar Mills Ltd.**
- **TandlianWala Sugar Mills Ltd.**
- **Two Star Industries (Pvt.) Ltd.**

Driver

Rate : PKR 180
Distance: 30 KM

Area-02

Checkpost-02

Problems:

1. Manual Checking/Stamping at the Check post.
2. Driver can get check post slip of higher rate area by visiting it without vehicle.
3. No data for cane supply planning, that how much cane is on the way.

Loading Points Vehicles Tracking System

Vehicle Tracking System (VTS) is an Android Smartphone Application for vehicles registration approval at Sugar mills loading Points (LPs) and vehicles acceptance/ rejection at their Sugar Mill Arrival.

Vehicle Tracking System (VTS) is three interface System designed and implemented in Sugar Manufacturing industry to secure sugarcane procurement process. VTS works with **Google Inc.** Global Positioning System (GPS). VTS smartphone application with compatible with all Android latest firmware.

A web based dashboard is available to the management for checking daily vehicles arrival, accepted & rejected, on the way vehicles summary on their smartphone, tablet PCs and laptops. Following are the major system features;

Loading Points Vehicles Tracking System

System Key Features

- Users Registration & Authentications
- Users' registration through authorized IMEI smartphones.
- System authentications based on users' roles & designations.
- System username and password security.
- GPS Area Restrictions.
- Dynamic search based on Vehicle No wise, registration number wise. LP number wise, date and username wise etc.
- System Compatibility with latest Android OS firmware smartphones.
- Vehicle registration and arrival photos image resolution adjustment including low, normal and high resolution photos considering the network bandwidth.
- L.P vehicles registration restriction for only defined maps radius.

Loading Points Vehicles Tracking System

Sugar Mills Loading Points Management

- Sugar Mill GPS Coordinates registration.
- Loading Points (LP) Registration.
- Loading Points defined coordinates.

Vehicles Registration & Approvals

- Vehicles Registration at loading points with vehicle captured images approved through System Admin user(s).
- Vehicle registration slip printing at L.P.
- Cross Check post scanning
- Data offline saving and synchronization at data connection with server.
- A live System for Loading Points Vehicles registration and approvals real-time data synchronization with Sugar Mills approval authority.
- A list of pending registration approval vehicles list available I real-time to Sugar Mills approval authority.

Loading Points Vehicles Tracking System

Vehicles Arrival & Verifications

- Vehicle Arrival through Barcode scanning via VTS app.
- Pending arrival vehicles details.
- Vehicles snapshots capturing at arrival and matching with vehicle registration snapshots.
- Approval /rejection based on images matching by Approval Authority.
- Vehicles rejection and Approval linked with SARP ERP Sugar Procurement modules.

Management Web Dashboards

- On the way vehicles detail
- Pending registration vehicles summary
- Pending verification vehicles summary
- Total verified vehicles
- Total rejected vehicles summary
- Daily total arrival
- System Alerts & notifications of registration, approval and verification activity on Dashboard

Reporting

- Pending Registration Vehicles detail
- List of Rejected Vehicles Registration
- On the Way vehicles detail
- Pending verification vehicles detail
- Accepted registrations detail
- Rejected registrations detail
- Early Arrival details
- Loading Points wise daily vehicles registration detail
- Loading Points Vehicles Summary

DEPOT MANAGEMENT SYSTEM

Sugar Mills' Depot Management System

Depot Management system is an online software application designed to record Sugar Mills' Depot Purchase in a real-time. The application features each Growers vehicle based entry and payment through a smartphone application.

It provides a clear view of each Contractor's depot purchased and sugarcane volume to be received by Sugar mill in upcoming days for deciding the Crushing capacity of the Plant.

Interface:

Smartphone App: for Depot Procurement, bills payment printing

Web Portal: To define and manage master setup of Depots, depot procurement records acceptance/rejection and to preview Depot Procurement reporting.

Sugar Mills' Depot Management System

Key Benefits:

1. Reduce Rate Corruption

Contractors buy cane at lower rate and wait till the rate revised.

1. Printed Invoice/SMS to make sure that the actual rate was paid to grower.

2. Grower Data Bank

3. Help in planning

By Knowing exactly which depot has how much supply in stock.

1. Reduce Rate conflict between Contractor and Mill.

In Manual procedure , it might be a risk that the updated cane rates didn't received to contractor.

Depot Management System

System Key Features

- Depot Setup (Name, Location, GPS coordinates, Geo-fenced area, Contractor Name, Depot Rate setup, Depot Targets)
- Contractors android access setup
- Depot Purchase Rate definition
- Android and Web users Roles based rights & Authentications.
- Depots Geo-Fencing on Google Maps.
- Vehicles entry including Vehicle & Deriver photo & Information, Gross/Tare weight photos of each vehicle and payment rates detail.
- Direct printing of Payment bill with recording of Depot Purchase entry.
- Compatible with Android Latest OS Firmwares.
- Web Portal for daily Depot wise procurement details.

Depot Management System

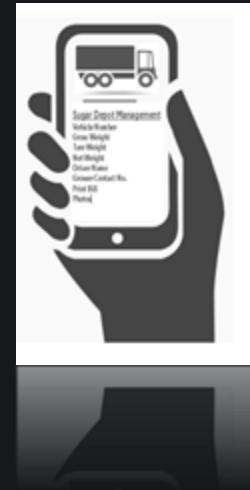

Key Benefits

- Depot users are bound to record Vehicles entry and pay bill directly from the App within Geo-fenced area of the depot.
- Transparency in Contractor Depot purchase rates.
- Each vehicle Photo, Weighment detail photo and direct printing of Payment bill from Android device.
- A better understanding of expected depot wise sugarcane arrival vs depot target.

Picture

A photograph of a man standing in front of a pile of sugarcane. He is holding a white sign with Urdu text that reads "عظیم شاہ بہاول" (Ezame Shah Bahawal). The background shows a sugarcane field and some structures.
